

REMARKS

Claims 1-30 are pending in the present application.

Claims 1-6 and 8-10 have been amended.

Claims 11-30 have been added.

The amendment of Claims 1-6 and 8-10 and the addition of new Claims 11-30 serve to remove multiple dependencies and to place the claims in a condition more consistent with U.S. patent practice. Accordingly, support for the foregoing is provided by Claims 1-30 as originally filed.

No new matter has been added by the present amendment.

Applicants submit herewith a substitute Sequence Listing and a corresponding computer-readable Sequence Listing. The sequence information recorded in the corresponding computer-readable Sequence Listing is identical to the paper copy of the substitute Sequence Listing. Support for all of the sequences listed in the substitute Sequence Listing is found in the present application. Applicants have also amended the specification, where necessary to ensure consistency between the specification and the Sequence Listing and to ensure that all disclosed sequence contain a sequence identifier. No new matter has been introduced by the amendment to the specification, the submission of the substitute Sequence Listing, and the corresponding computer-readable Sequence Listing.

Applicants submit that the present application is in condition for examination on the merits. Early notification to this effect is respectfully requested.

Respectfully submitted,
